Experience the Ease of Onsite Dialysis

Are you a kidney patient living at or transitioning to a skilled nursing residence or rehab center? If so, you should know dialysis usually requires frequent travel to and from a center for treatment—which may feel inconvenient, disruptive and stressful.

Now, onsite dialysis offered at skilled nursing residences reduces the need for travel, allowing you to receive treatments in a more convenient and consistent way, and giving you more time for the things you enjoy.

DaVita Care, Support and Resources—Right at Home

DaVita Team

Get the same dedicated providers and care as in a DaVita clinic without leaving home. Trust in the expertise of a national kidney care leader along with medical director oversight and a highly trained clinical staff.

Educational Resources

Enjoy our extensive library of award-winning patient education, including Kidney Smart®, Start Smart™ and Transplant Smart® services and materials.

Clinical Programs

Experience clinical programs aimed to help keep you at home and out of the hospital. In 2019, we helped patients collectively gain some 100,000 days at home instead of in the hospital.¹

Coordinated Care

Feel confident knowing better communication and care coordination between your DaVita and residence staff helps them tailor your care to support your overall health.

Care Plan Consistency

If you were already receiving dialysis in a center three times a week, you can continue your treatment plan with ease.

A New Opportunity for Dialysis Patients

If you're one of the estimated 50,000 (1 in 10) dialysis patients who will be or are currently living in a skilled nursing residence², you have the new opportunity to experience the many potential benefits of onsite dialysis. Make the most of your opportunity with a known and trusted leader in kidney care.
